## An objective method to analyse some microscopic characteristics of two secondary beech wood resources

L Gurau, MC Timar, M Cionca, A Olărescu... - Pro Ligno, 2010 - proligno.ro

Abstract: Two of the most ignored secondary resources, the branches and the juvenile wood from forest thinnings, mainly used as firewood, are insufficiently known and exploited in spite of limited natural resources. They could be used in new added value products as an ...

## The effect of the heat treatment of sessile oak wood (Quercus petrea L.) from young trees on the properties of panels with transversal grain.

L Gurău, M Câmpăan, A Olărescu, M Porojan... - Pro Ligno, 2012 - cabdirect.org

Abstract Sessile oak from young trees represents a secondary resource with potential for superior applications in furniture panels providing their dimensional stability to variations of relative air humidity is reduced. A possibility to improve this property was examined in this ...
