

LISTA PUBLICAȚIILOR

1. Cățeanu, M. Măsurători geodezice prin unde: scanarea laser aeriană. Editura Universității Transilvania, Brașov 2021. ISBN 978-606-19-1371-8.
2. Cățeanu, M., & Ciubotaru, A. (2021). The Effect of LiDAR Sampling Density on DTM Accuracy for Areas with Heavy Forest Cover. *Forests*, 12(3), 265. **Indexat ISI Web of Science, IF = 2.221, SRI=1.43**
Disponibil la: <https://www.mdpi.com/1999-4907/12/3/265>
3. Cățeanu, M., Ciubotaru, A. (2020). Accuracy of Ground Surface Interpolation from Airborne Laser Scanning (ALS) Data in Dense Forest Cover. *International Journal of Geo-Information*. **Indexat ISI Web of Science, IF = 2.239, SRI=0.50**
Disponibil la: <https://www.mdpi.com/2220-9964/9/4/224>
4. Ghimbășan, A., Vorovencii, I., Cățeanu, M. (2019). Using images acquired from a rural area with unmanned aerial vehicle in order to achieve the land and constructions cadaster. *Proceedings of the 8th Edition of the Biennial International Symposium Forest and Sustainable Development*, Transilvania University Press, ISSN 1843-505X, **jurnal BDI**
Disponibil la: <https://www.cabdirect.org/cabdirect/abstract/20193382882>
5. Cățeanu, M., Arcadie, C. (2017). ALS for terrain mapping in forest environments: an analysis of lidar filtering algorithms. *EARSel eProceedings* 16(1), p. 9-20. **Proceedings conferință internațională.**
Disponibil la: http://eproceedings.org/static/vol16_1/16_1_cateanu1.pdf
6. Cățeanu, M., Ciubotaru, Tereșneu, C. C. (2017). Lidar data for terrain slope estimation in forest areas. *Proceedings of the Biennial International Symposium. Forest and sustainable development*, Brasov, 7-8th October 2016, pp. 35-40. **Indexat în CAB Direct.**
Disponibil la: <https://www.cabdirect.org/cabdirect/abstract/20173192447>
7. Cățeanu, M., Ciubotaru, A., Tereșneu, C. C. (2017). Lidar for ground surface mapping in forest environments. *Journal of Young Scientist*, Volume V, ISSN 2344-1283.
Disponibil la: http://journalofyoungscientist.usamv.ro/pdf/vol_V_2017/Art29.pdf
8. Cățeanu, M. (2015). Folosirea tehnologiei LiDAR pentru obținerea datelor geomorfologice în zonele acoperite cu vegetație forestieră. *Revista Creativitate și Inventică nr. 2*, ISSN 2067-3086. **Indexat în DOAJ (Directory of Open Acces Journals).**
Disponibil la: http://old.unitbv.ro/creativitate/Programe/Sesiunea_II_6%20iunie%202015.pdf

Cățeanu Mihnea
